Akrilik kapak sağlıklı olması ve ayna parlaklığı gibi çok parlak bir yüzeye sahip olması tercih nedenlerindendir. Yüzeyinin parlak ve ışıltılı olması nedeniyle, mutfak ve banyo dolaplarının kapaklarında, televizyon ünitesi, dolap kapağı üretimlerinde de kullanılır. Bir mutfak dolabında akrilik kapak kullanıldığında, granit bir tezgâh, inox tarzındaki beyaz eşyalar ve aksesuarlar ile bir bütün oluşturduğunda, oldukça göz alıcı bir görünüm sağlamaktadır. Akrilik kapakların sağlıklı, suya, neme karşı dayanıklı ve uzun ömürlü olması da uygulandığı yere değer katmaktadır. Akrilik kapaklar, çok kolay temizlenebiliyor ve hatta pasta/cila ile oluşabilecek çizikler tamir edilebiliyor. Pürüzsüz bir yüzeye sahip olan akrilik kapaklar, UV teknolojisi kullanılarak oluşturulan koruyucu tabaka sayesinde, çok uzun yıllar rengin ve desenin parlaklığının ilk günkü gibi korunmasını sağlıyor. Akrilik kapak, sağlığa zararlı ve kanserojen herhangi bir madde içermediği gibi, istenilen renk ve desende oldukça geniş bir seçenek sunuyor. Akrilik kapakların kenarlarına uygulanan bantlar da aynı renklerde yapılabilir.

Çizilmeye karşı direncinin artırılması için, koruyucu folyo çıkarıldıktan sonra, mobilya yüzey temizleyicisi marifeti ve yumuşak bir bez ile temizlenmeli, 24 saat boyunca da temizlenen yüzeye dokunulmamalıdır. Akrilik kapakların temizliğinde solvent tiner bazlı kimyasal maddeler kullanılmamalıdır.

Akrilik kapakların kullanım alanları sadece banyo ve mutfak dolabı değildir. Bunların haricince bütün mobilyalar, ev dekorasyonu, mağaza dekorasyonu ve iş yeri dekorasyonunda kullanılabilir.
